

School Year 2022-23

A Specialized Academic Year

For

Myron B. Thompson Academy Seniors

Students who will be seniors in School Year 2022-23 are a special group at Myron B. Thompson Academy. They doubled up on science classes in the 9th grade (Chemistry and Biology), doubled up on Social Studies/History (U.S. History and World History) during grade 10 and English Language Arts 3 and 4 in 11th grade. It has been a challenge, but now comes the reward----- specialization in one of four select areas of study senior year. Myron B. Thompson Academy is proud and excited to introduce...

The Capstone represents the culminating high school academic experience
And will facilitate entry into post-secondary education or
the exciting world of IT.

The Capstone Institutes

Application of new knowledge and skills in a substantive, multi-dimensional project, or certification program.

The Capstone represents the culmination of the high school academic experience and will facilitate entry into post-secondary education or the exiting world of IT.

The Capstone Institutes are mandatory for all seniors. Elective credits and grades will be awarded. MBTA has spent several years researching specialized study for seniors, and the advantages are many.

The goals of the institutes are:

- Ensure entry into post-secondary education or the world of work with a solid academic foundation and marketable knowledge and skills
- Require critical and creative thinking, oral and written communication, information and media technology and collaboration.
- Demonstrate and problem-solving skills.
- Display commitment to a long-term project, including a willingness to make modifications when things don't go as planned.
